ABOUT

Results-driven Software Engineer with a strong Computer Engineering background and hands-on experience building scalable applications. Skilled in React, Next.js, and Node.js, with knowledge of .NET and Spring Boot. Experienced in RESTful APIs, database management, and both monolithic and microservices architectures. Familiar with Docker, Kubernetes, AWS, and CI/CD practices.

EDUCATION

BSc. in Engineering (Hons) 2021 – 2025
Department of Computer Engineering, University of Ruhuna, Sri Lanka
GPA: Second Class Lower Division

GCE Advanced Level 2015 – 2019
Ch/Ananda National College-Maths Stream
District Rank: 13

TECH SKILLS

Languages: JavaScript, TypeScript, C#, Java, PHP
Frontend: React, Next.js, TypeScript, HTML, CSS
Backend: Node.js, Express.js, .NET (C#), Spring Boot, Laravel
Databases: PostgreSQL, MongoDB, MySQL
Cloud/DevOps: Docker, AWS
Project Management: Github, Jira
Core: Data Structures, Software Architecture, Microservices
Other: Machine Learning, Blockchain, Cybersecurity Fundamentals
Core Strengths: Problem-solving, Team collaboration, Communication, Adaptability in startup environments

EXPERIENCE

PayMedia Aug 2024 – Feb 2025
Frontend Developer Intern Sri Lanka

- Developed and deployed production-grade frontend features for the Dhiraagu fintech platform admin portal using Laravel (Blade) for server-side rendering.
- Designed and built a scalable admin dashboard using Next.js and React, enhancing data management and user experience.
- Collaborated closely with backend engineers to integrate RESTful APIs built with PHP Laravel and PostgreSQL.
- Diagnosed and resolved critical production issues, ensuring system stability and minimizing downtime.
- Tech:** Next.js, React, PHP, Laravel, Prisma, PostgreSQL, Tailwind CSS, Git

PROJECTS

Restaurant Management System April 2026
Github

- Built a full-stack restaurant management system with dedicated interfaces for customers, waiters, kitchen staff, and administrators.
- Implemented real-time order tracking, JWT-based role authentication, QR-code table ordering, billing management, and admin analytics dashboards.
- Developed RESTful APIs and PostgreSQL database architecture using Prisma ORM for scalable and efficient restaurant operations.

- **Tech:** TypeScript, React, Tailwind CSS, Node.js, Express.js, PostgreSQL, Prisma ORM, Socket.io, JWT

Life-Drop Mobile App

March 2026

Github

- Built a full-stack mobile app for blood donation with role-based access, GPS-based center discovery, and automated appointment and request management.
- Developed React Native frontend and Node.js/Express backend, with Prisma ORM and Dockerized deployment for scalable and maintainable architecture.
- **Tech:** React Native, Node.js, Express.js, Prisma, PostgreSQL, Docker, RESTful APIs

URL Shortener Microservices

April 2026

Github

- Developed a production-ready URL shortener using microservices architecture with .NET 8.
- Deployed on AWS EKS with Docker and Kubernetes, enabling scalable and containerized services.
- Implemented JWT authentication, Redis caching for fast redirects, and RabbitMQ for async processing.
- Integrated PostgreSQL with EF Core and built CI/CD pipeline using GitHub Actions.
- **Tech:** NET 8, ASP.NET Core, PostgreSQL, EF Core, Redis, RabbitMQ, Docker, Kubernetes, AWS, GitHub Actions, JWT

Blockchain-Based Defect and Fraud Identification in Supply Chains

June 2025 – Dec 2025

Final Year Project | Faculty of Engineering | Demo

- Contributed to the development of a blockchain-enabled cold supply chain system for secure shipment tracking.
- Developed frontend interfaces using React.js and TypeScript for shipment management and asset tracking features.
- Implemented QR-code-based asset identification and built mobile interfaces using React Native for tracking functionality.
- **Tech:** React.js, TypeScript, React Native, Express.js, PostgreSQL, Sepolia Testnet, Infura, IoT Hardware

Colombo International Bookfair Reservation System

Oct 2025 – Dec 2025

Microservices-Based Full-Stack Web Application | GitHub

- Contributed as a backend developer in a microservices-based reservation system for managing Colombo Bookfair stall bookings.
- Implemented Stall and Reservation services using Java, handling booking logic, availability management, and reservation workflows.
- **Tech:** Java, Spring Boot, REST APIs, GitHub

ACTIVITIES

- Participated in the Red Cyber Cybersecurity Competition, strengthening practical security and analytical skills.
- Selected as a Final Year Project Demonstrator at Rextro Exhibition 2025, presenting technical solutions to academic and industry audiences.
- Competed in an Interfaculty Dancing Competition, demonstrating teamwork and adaptability.
